Focal Theme : Environment, Population & Sustainable Development

Environment, Population and Sustainable Development have emerged as fundamental themes of discussion, analysis and synthesis in the 21st century geography. In fact, the present geography has apparently begun to function as spatial science and due to that the spatial pattern, process, organization of above theme and subthemes are in the centre of attention. It is found that the environment is degrading rapidly. Biodiversity and ecosystem are endangered. Rapid population growth and demographic attributes, as like, total fertility rate, mortality rate, sex-ratio, trend of Pyramidal inversion etc. are alarming and challenging. Since the days Brundtland Commission report on our common future, the Sustainable Development agenda has taken central place in any kind of planning and development strategy in the world. Alarming challenges with regard to environment and population have caused the emergence of functional trilogy of environment, population and Sustainable Development. All three need to be considered together for healthy environment and well-being of the mankind.

The proposed International online Conference on the theme – “Environment, Population and Sustainable Development” promises to encourage researcher, practitioner, scholars and other stakeholders to make them capable to create new ideas, new philosophy and pragmatic approaches towards resolving the above issues and also to contribute in developing the concept of Sustainable Development as a tool to bring development, not only to meet the present generation needs but also to meet the future generation needs.

The focal theme is interdisciplinary and also of Contemporary relevance. It needs to be discussed in different technical sessions so that the outcome of the conference becomes academically thought provoking and fruitful to meet social expectations. Therefore, the conference is divided into 23 technical sessions. Subthemes of technical sessions are given below:

ABOUT THE CENTRE FOR GEOGRAPHICAL STUDIES

The Centre for Geographical Studies, Patna is an autonomous institution established by Government of Bihar in 2018 and it started to function in 2020. This Centre for Geographical Studies is the first Geographical research Centre in India which is established and fully financed by the Govt. of Bihar. Statutory provisions provide complete autonomy for any kind of decision to promote quality research. The focus of this Centre will be to develop quality knowledge and skills comparable to any leading research institution of the world. As the Centre is established by the Govt. of Bihar with an understanding that geographers may contribute in resolving the issues of backwardness, regional socio-economic disparity, disaster mitigation and welfare of under privileged groups. Geography is the subject of interdisciplinary nature. It addresses spatiotemporal analysis in most of research work. So, the aspiration of the state seems genuine and the centre is gearing itself to respond positively as an instrument/institution to suggest the state for resolving the problem. However, it researches concern will not only remain for Bihar but beyond the territorial limits with objectives of the solutions of socio economics and disaster related problems around the world.

The Centre for Geographical Studies will primarily focus on planning problem. This Centre will serve as a public planning and policy-research. Centre contributing towards the state and eventually towards national development policies and strategies. Eventually it will emerge as world class research centre in Bihar. However, the activities of the centre will not only be confined to research, the centre will also extend quality teaching in specific core areas of geography which will strengthen the quality research. At the same time consultancy and training programmes will also be taken up. These activities will create pivotal role for the centre in the planning, development and job creation avenues in Bihar. Therefore, we believe in innovation and to promote research.

Now a days, resource crunch and degradation of environment are emerging as potential threat for the survival of mankind. There is a need to address these issues in geographical perspective, so that we may contribute in achieving the sustainable development goal & declaration by the U.N.O and the Government of India. In order to strengthen the objectives, the centre will work in close collaboration with Government agencies, institution of prominence, NGO and the corporate sectors.

Principles

Realization of the vision and mission is based on these value-based principles -

- **Excellence :** Basic commitment to the development of academic, educational, and research of human and natural systems, land use change, and geospatial information science. Harnessing the interrogative nature of geographic science to answer the fundamental questions of local regional and global importance.
- **Collaboration :** Collaboration and integration across institutions and disciplines locally and globally. Outreach through partnerships to foster the development of skills learning, scholarships, and policy work.

XVI DGSi International Geography Online Conference

- **Sustainability** : Informed and active future should be developed by understanding mutual interdependence and symbiotic relationship with nature if they are to make responsible choices for the future.
- **Diversity** : We value our diversity and accept its strength. The sustainable future development has to be based on the edifice of these diversity and mutual respect for each other.

Vision

Centre for Geographical Studies will be a corner stone of learning and of academic excellence. It will be the destination of choice for meritorious students. This will be achieved by actively fostering learning and enquiry.

Mission

- To build intellectual, creative, and practical abilities of the institution and students.
- To recruit and retain outstanding faculty to foster the advancement of developmental vision and mentoring emerging scholars to realize their highest potential and assume roles of leadership, responsibility and service to society.
- To create a wealth of Knowledge through rigorous research work and make vital publications.
